PROJECTS EXPERIENCES

Web-Based Mobile Phone Shop Sales and Management System (Group Project)

10/2024 - 12/2024
Technologies: PHP, MySQL, JavaScript, HTML5, CSS3
Concepts: Full-Stack Web Development, Responsive Web Design, 3-Tier Architecture
Developed a full-stack responsive web application for mobile shop management using PHP, MySQL, JavaScript, HTML5, and CSS3.
Implemented user authentication and role-based access control for staff and customer management.
Designed and enhanced inventory and order processing modules to manage stock and online orders.
Integrated warranty claims, customer inquiries, notifications, and automated sales reporting.
Applied 3-tier software architecture to improve system scalability and maintainability.

Web-Based Clothing Sales and Management System – Elegance Fashion

08/2025 - 10/2025
Technologies: PHP, MySQL, JavaScript, HTML5, CSS3
Concepts: E-Commerce System, CRUD Operations, Database Management
Developed a full-stack web-based clothing sales and management system using PHP, MySQL, JavaScript, HTML, and CSS.
Implemented user/staff management with role-based access, inventory tracking, product catalog, and sales reporting.
Created responsive user interfaces to enhance usability across devices.
Executed CRUD operations and designed relational databases for efficient data storage and retrieval.

SUMMARY

Motivated BIT undergraduate at the University of Moratuwa with a strong passion for web development. Skilled in building web applications using modern web technologies and experienced in developing academic projects. Eager to apply my technical knowledge, problem-solving skills, and creativity to contribute as a Web Developer Intern while continuously learning and improving in a professional environment.

TECHNICAL SKILLS

Web Development	CSS	React.js
MySQL	HTML	JavaScript
		PHP

PROJECTS EXPERIENCES

Web-Based Environmental Violation Reporting System – Eco Guardian

📅 05/2025 - 01/2026

Technologies: React.js, PHP, MySQL, JavaScript, HTML5, CSS3

Concepts: Full-Stack Web Application, Community Engagement Platform

- Developed Eco Guardian, a full-stack environmental reporting platform enabling citizens to report environmental violations in Sri Lanka.
- Built a dynamic frontend using React.js for a responsive and interactive user interface.
- Implemented real-time reporting with geolocation to capture and track environmental incidents.
- Enhanced community features with discussion forums, eco-tasks, events, donation modules, and a sustainability marketplace.
- Developed backend services with PHP and MySQL to manage data and user interactions.
